The buck Ends here . . . .

By Ivan D.E. Beaumont

Ken Morehead, Falls City auto dealer, told Legionnaires the other night that he could wait 15 or 20 years before seeking the office as head of Nebraska Legionnaires.

"But why wait? I'm full of fire now; I'll take time from my work and do the best job I can as Department Commander. I may not be so full of fire in 15 or 20 years."

That drew smiles from some of WWI war horses at the dinner meeting.

The Legion is attempting to beef up its Holmes-Legion midget and junior baseball league this year. A play-by-play report of the action at Steinhart park was initiated by Commander-elect Jack Johns during the July Fourth celebration.

The post bought a loud speaker system and built a press box on the top row behind the umpire. Frank Bataillon, athletic chairman for the Legion, hopes to install a flagpole near the scoreboard and hold a flag raising ceremony before every game.

+ + + + +

Frank is my friend. I was helping with the money-in-the-sawdust kiddies game during the Fourth celebration and got trampled when Frank said "go."

Didya hear the one about the 60-pound Jaycee leaguer who belted one in his first game?

The ball scraped the bottom of the bat and jiggled straight back to the pitcher who fumbled it. There was still plenty of time to nail the batter at first, though. But the pitcher wound up and threw the ball over the first baseman's head.

The slugger flew on toward second base.

Someone retrieved the ball and threw it to second where it went sailing into left field. The hitter swaggered into third, puffing a man-sized grin, then clomped onto home plate.

"Oh, boy!" he shouted with pride.

"That's the first home run I ever hit in my whole life!"

In Africa, some of the native tribes practice the strange custom of beating the ground with clubs and uttering wild, blood-curdling yells.

Anthropologists call this a form of primitive expression.

Nowadays, we call it golf.

Al Larson, Kingsley, Ia., telephoned the other day to say "Thanks" to Company A guardsmen.

The Larson family was stranded here when their car caught fire. Guardsmen fed the family, gave them cash and took them to Kingsley.

Larson said Chief of Police Clarence Iversen who directs the Salvation Army services, was also contacted for help, but the guardsmen took over and got the family back on its feet.

Work is under way on the 50-bed addition to Nebraska City Manor and manager Albert Inman says addition will be filled not too long after its completion, scheduled for several months from now.

Inman says that while there is no "waiting list" at the Manor, like there is at Riverview Terrace, families will come to him and in time the addition will be occupied to capacity.

Up on the North 40.

For a while there, I had begun to think that Bill Rose at Earl May's had sold me popcorn seed instead of sweet corn seed.

The long dry spell is yielding runt-sized stalks and small ears. My late planting absorbed the recent moisture and will outgrow the first rows by two or three feet.

We got mixed up on the bean seed this year and planted climbing beans. And boy, are they climbing.....and at least it looks like there will be beans.

Bond posted by two youths after arrest

Charles L. Andrew, 17, Omaha, and Kenneth R. Rush, 16, Valley, were released from custody at Otoe county jail after posting bond of $100 each.

Both were picked up for allegedly blowing up a toilet stool at the rest stop on U.S. 73-75 north of Nebraska City early Friday with a cherry bomb. The two also reportedly broke a light in the restroom.

A third youth, Mark White, 17, Valley, was asleep in the back of the car the youths were driving when the incident occurred and was not charged.

Trial was set for Tuesday at 10 a.m. in county court at Otoe county courthouse.

Violent weather blows on Fourth

By United Press International

Violent weather put nature's own nightcap on Fourth of July festivities across the Great Lakes region, leaving at least eight dead and many injured.

At least 11 tornadoes were reported in northern Ohio, the worst causing seven deaths in the Cleveland area. A twister cut across southeastern Michigan, leaving a path of destruction 400 feet wide and 1½ miles long near Whittaker, 12 miles southwest of Detroit. Seventy-mile-an-hour winds downed power lines and trees in Manitowoc, Wis., about 60 miles north of Milwaukee.

Three persons died when a tornado struck Edgewater Beach Park, west of downtown Cleveland, where thousands of persons were watching a fireworks display. Two teenaged girls were killed by falling trees as another twister roared through nearby Lakewood Park, where about 5,000 persons had gathered.

Two men in the Cleveland area were electrocuted when they attempted to move wires which fell across their cars. The eighth victim, a Toledo youth, was killed by a falling tree at Cedar Point Playground, on the eastern edge of Lake Erie.

100 M.P.H. Winds

Winds up to 100 miles an hour whipped the lake into froth, capsizing some pleasure boats and sending others crashing into breaker walls. The Coast Guard sent four ships, six helicopters and six planes and called for a C130 rescue plane from new york to assist in rescuing boaters but the weather forced temporary postponement of rescue operations.

Willoughby, Ohio, in Lake County, declared a state of emergency when the storms knocked mut power. Civil Defense workers evacuated families from the north side of Wooster, in Wayne County, after a deluge of rain poured as much as five feet of water into basements.

In Michigan, the twister sighted near Whittaker injured four persons and destroyed several house trailers. Another tornado reportedly uprooted trees and damaged three houses in Hillsdale County, in South-Central Michigan. Golf ball-sized hail fell near Ann Arbor and Pontiac and heavy rain flooded underpasses and small streams in sections of southwest Lower Michigan.

Warm Front Across Lakes

The severe storms were associated with a warm front moving across the lower Great Lakes, and where it did not bring storms, the front carried sweltering heat and high humidity.

In Chicago, 94-degree heat and high humidity drove an estimated 300,000 persons to Lake Michigan beaches, while thousands more sought relief in city swimming pools. About 1,600 diehards toured city golf courses.

Other parts of the nation had to supply their own Fourth of July fireworks. A few showers continued into today across the Central Plains and into the Middle Mississippi Valley. Showers also fell along the northwestern border.

Very warm and humid weather continued throughout the South and Southwest. Blythe and Imperial, Calif., recorded 117-degree temperature readings Friday.

Early morning temperatures today ranged from 43 at Evanston, Wyo., to 94 at Needles, Calif.

VANDALISM REPORTED—Police investigated a report from Don Wulf, 918 13th Avenue, Friday, that two aluminum poles on a 12 by 12 foot canopy had been bent by vandals. The canopy fell to the ground.

Farm Bureau has a plan

ON THE FARM FRONT
(Reg. U.S. Pat. Off.)
By BERNARD BRENNER
UPI Farm Editor

WASHINGTON (UPI) — The American Farm Bureau Federation's new farm policy plan would wipe out most current federal farm programs over a five-year period.

Farm Bureau President Charles B. Shuman said the plan would reduce government costs and help farmers get high prices.

Following the five-year transition in which present support and acreage control programs for wheat, feed grains and cotton would be scaled down gradually, farmers would be left with the closest thing to a free market economy they had known in more than 40 years.

The departure of government from agriculture would not be total. The Farm Bureau plan includes creation of a long-term land retirement program to help keep the nation's overall farm productive capacity close to balance with demand. The long-term retirement program would enroll at least 10 million acres in each of the five years beginning with 1971, building up to a peak of at least 50 million acres by 1975.

Retain Some Supports

Also, the Farm Bureau plan makes no mention of eliminating the longstanding price support and production control programs for tobacco, peanuts and rice, or the supports for dairy products and a number of relatively minor crops.

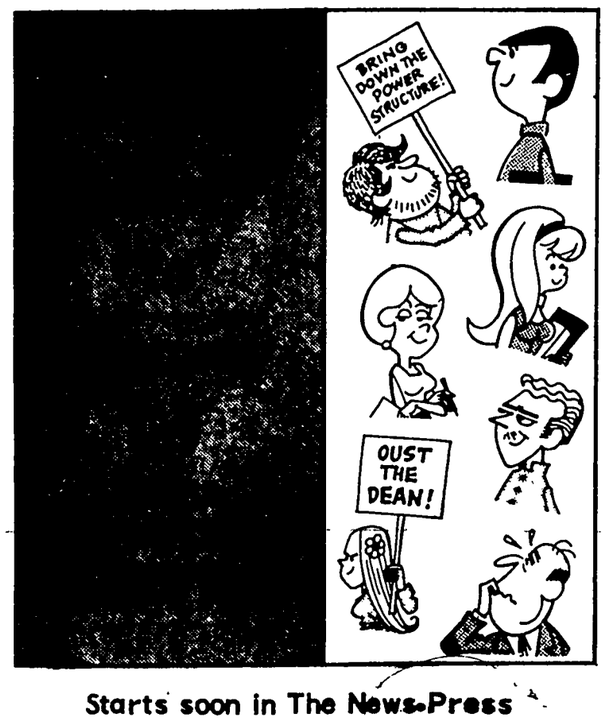

Most of the present federal farm support and control operations, however, are concentrated on feed grains, wheat, cotton and soybeans.

For these crops, the Farm Bureau plan would provide a sharp cut in price support loans —down to a ceiling of 85 per cent of previous three-year average prices — beginning in 1971. A gradual phase-out of supplementary direct payments which now run about 3 billion a year would also begin for grains and cotton in 1971. And beginning in 1975, producers of grains, cotton and soybeans would operate with no production controls and no direct payments. Their only support would be a continued price support loan, which would be set well below projected market price levels.

Roster of Sponsors

The Farm Bureau plan was introduced in the Senate Tuesday by 19 members headed by the Senate's GOP leader, Everett M. Dirksen of Illinois. But the roster of sponsors indicated many farm belt Republicans were—so far, at least—leary of going as far as the Farm Bureau plan proposes.

The 18 GOP sponsors included 8 from eastern states, 6 from mountain and western states, and only 5 from the traditional midwestern farm belt. The Midwesterners included Sens. Dirksen and Charles H. Percy, Ill., Robert P. Griffin, Mich., William H. Saxbe, Ohio, and Jack Miller, Iowa. The lone Democratic sponsor was Sen. Abraham Ribicoff of Connecticut.

Falls City host to CPPD employes

FALLS CITY (UPI)—Approximately 35 persons connected with Consumers Public Power District visited Falls City this week to look over the city as a possible future home.

Most of the visitors were couples from Lincoln and Crete now employed at the Hallam Sheldon Station. Eventually they will be transferred from there to the Cooper nuclear station at Brownville.

The group earlier visited Auburn and Nebraska City.

Road construction schedule unveiled

LINCOLN (UPI) — The State Roads Department has announced a $31.9 million "balanced" road construction schedule for the remainder of the year.

At a news conference, State Engineer Marvin Nuernberger said the letting schedule "attempts to obtain a balance of projects statewide and between the various types of construction..."

According to State Maintenance Engineer Oliver Johnson, 40 per cent of the money will go for work on Interstate 80 in the Panhandle, 21 per cent for "all types" of construction in the Omaha area, 21 per cent for work on roads other than the Interstate in the east half of the state and 18 per cent for non-Interstate work in the west half of the state.

Deputy State Engineer Gerold Stroebel said the "balanced program" is an attempt to make up for the projects let in the first half of the year when $10 million of the total $29.7 million allocation was earmarked for work on the downtown Omaha bridge.

Of the total $31.9 million letting, $18.5 million is allocated for work on the Interstate. This includes nine miles between Chappell and Lodgepole and 6.3 miles between Bushnell and the Nebraska-Colorado state line.

The latest letting brings the total amount of construction contracts for the year to $64.6 million, more than the total of all contracts let during the past two years.

For the first time, Nuernberger said, the State Roads Department will make use of the $30 million road construction bond issue authorized earlier in the year by the Nebraska legislature.

He said some of the projects which normally could not be financed without federal highway aid will be temporarily financed from state money raised through the issuance of bonds. This money will be later reimbursed by the federal government.

The state engineer said the first bonds are expected to be issued in October but that if necessary a bond issue could be delayed until December.

Of the types of construction work involved, Johnson said, 30 per cent is grading and culverts, 30 per cent concrete paving, 13 per cent bridge construction, 10 per cent asphalt surfacing and 17 per cent secondary road construction and miscellaneous maintenance.
